

Experiment 6:

Name: Amirtha S R

Roll Number: 240701036

Title / Cover Slide

Heading: UID EX 6 **Topic:** TechKart — RAD Prototype for a Computer Hardware Shopping App **Subtitle:** Rapid Application Development | UI/UX Design using Axure RP

What is RAD? (Theory Block)

Copy the RAD definition from your PDF, then add below:

Why RAD suits TechKart?

- Hardware specs change frequently — iterative design helps adapt fast
 - Users are tech-savvy — their feedback shapes filter/compare features
 - Fast prototyping lets us test complex flows like "Build Your PC"
-

Phase 1: Requirements Planning Key

Features to list in Axure:

Navigation Pages:

- Home
- Hardware Categories
- Product Listings
- Product Details + Spec Sheet
- Compare Products (unique to hardware!)
- Cart
- Order Confirmation

User Actions: Browsing, Filtering by specs (RAM size, socket type), Comparing 2 products, Adding to Cart, Checkout, Tracking Shipment

Requirements Document (numbered list):

1. View hardware categories (CPU, GPU, RAM, SSD, Coolers, Motherboards)
2. Filter products by brand, price, socket type, wattage
3. View detailed spec sheet for each product
4. Compare two products side-by-side
5. Add to cart and adjust quantities
6. Enter shipping and payment details at checkout
7. View order confirmation with estimated delivery

Phase 2: User Design

Tools Used: Axure RP 10

Wireframes to design (one per screen):

Screen 1 — Home Page What to

show:

- Top bar: Logo "TechKart ", Search bar, Cart icon, Wishlist icon
- Banner: "Top Deals on Intel & AMD CPUs "
- Section: "Shop by Category" — icon grid (CPU, GPU, RAM, SSD, Motherboard, Cooling)
- Section: "Best Sellers" — horizontal scroll cards
- Bottom nav: Home | Categories | Compare | Cart | Profile **Card content example:**

Intel Core i5-13600K 4.6 | ₹22,499 Free Delivery [Add to Cart]

Screen 2 — Hardware Categories Page What

to show:

- Grid of category tiles with icons/images:
 - Processors (CPUs) ○ Graphics Cards (GPUs) ○ RAM / Memory ○ Storage (SSD / HDD) ○ Motherboards ○

- Cooling Solutions ○ Power
- Supply Units ○ Peripherals

- Top bar with search icon

Screen 3 — Product Listings Page (e.g., CPUs) What to

show:

- Filter bar: Brand | Price Range | Socket Type | TDP
- Sort: Relevance | Price ↑ | Price ↓ | Ratings
- Product cards (vertical list or 2-col grid):

Card 1:

AMD Ryzen 5 7600X Socket AM5 | 6 Cores | 4.7GHz Base 4.5 | ₹19,999 ~~₹24,000~~ Free Delivery | [Add to Cart]

Card 2:

Intel Core i7-13700K Socket LGA1700 | 16 Cores | 3.4GHz Base 4.7 | ₹35,499 ~~₹42,000~~ Free Delivery | [Add to Cart]

Card 3:

Intel Core i3-13100F Socket LGA1700 | 4 Cores | 3.4GHz Base 4.3 | ₹9,299 ~~₹11,000~~ Free Delivery | [Add to Cart]

Screen 4 — Product Detail Page What to

show:

- Product image (large, top)
- Product name: "AMD Ryzen 5 7600X"
- Rating: 4.5 (1,243 ratings)
- Price: ₹19,999
- **Spec Sheet section:**

Spec	Value
Socket	AM5
Cores / Threads	6C / 12T
Base Clock	4.7 GHz
Boost Clock	5.3 GHz

TDP 105W

Cooler Included No

Architecture Zen 4

- Buttons: [Add to Cart] [Buy Now] [Compare]
- "Compatible With" tag: AM5 Motherboards

Screen 5 — Compare Products Page (*unique feature!*) What to

show:

- Two columns side by side
- Left: AMD Ryzen 5 7600X | Right: Intel Core i7-13700K
- Rows: Price, Cores, Threads, Base Clock, Boost Clock, TDP, Socket, Cooler Included
- Highlight better value in green , worse in subtle red
- Button: [Add Winner to Cart]

In Axure: create a 2-column table widget, use conditional formatting highlight

Screen 6 — Cart Page What to

show:

- Item: AMD Ryzen 5 7600X
- Price: ₹19,999 | 10% off applied
- Quantity: [-] 1 [+]
- Delivery to: [Your address, Chennai] [Change]
- Price Breakdown:**
 - MRP: ₹22,499 ○
 - Discount: -₹2,500 ○
 - Delivery: Free ○
- Order Total: ₹19,999**
- [Proceed to Checkout →]

Screen 7 — Order Confirmation Page What to

show:

- Big green checkmark animation (in Axure: use dynamic panel)
 - **"Order Placed Successfully! "**
 - Order ID: #TK2024-88471
 - Product: AMD Ryzen 5 7600X
 - Estimated Delivery: 3–5 Business Days
 - Buttons:
 - [Track Order] ◦
 - [Return to Home]
-

Phase 3: Construction (Axure Details)

Prototype Flows to build in Axure:

Home → Hardware Categories → Product Listings → Product Detail → Add to Cart → Checkout → Order Confirmation

Dynamic Elements to simulate:

- Quantity counter (–/+ buttons with dynamic panel updating number)
- Compare toggle (selecting 2 items opens compare drawer)
- Cart badge count updates when item is added
- Confirmation screen with checkmark animation (Axure keyframe / show-hide)
- Filter panel slides in from left on tap

Testing & Iteration:

- Prototype previewed in Axure Preview / Share mode
 - Checked: visual hierarchy, tap target sizes (min 44×44px), readable spec text
 - Iterated: added Compare feature after feedback that users wanted to diff CPU specs
-

Page 6 — Phase 4: Cutover Finalization:

- Final Axure prototype shared via Axure Cloud link

- Annotated components exported (headers, nav bar, product card, spec table, cart summary) •

Handed off with: screen flow diagram + component notes **Developer Notes to include:**

- All screens designed at 390×844px (iPhone 14 standard)
- Reused components: Top Nav Bar, Product Card, Bottom Nav Bar, Price Breakdown Block
- Annotations added per button explaining expected API call (e.g., "POST /cart/add")
- Could be converted to HTML/CSS or React Native using Axure's inspect panel
